

## **Session 11: Design slide show**

**Context:** Introduction to Permaculture Design course, second day

**Duration:** 45 minutes

**Aims:** An opportunity to allow you to show some of your own design work. This will give the students inspiration, allow them to see tangible results of design in action and point the way to some possible next steps.

**Learning outcomes:** By the end of the session, students will have seen real world examples of design and gained some new ideas for their own designs.

### **Method & timings:**

45 minutes slideshow: use this time as an opportunity to talk through some of your own design work, pointing out the design challenges & opportunities of certain sites, and the benefits of the scheme.

**Resources:** Slideshow of your own designs.

**NOTES:** This may be considered an optional session; if you don't have suitable slides, you could drop this session entirely and extend the designing and design presentation sessions.

Keep the discussion firmly on the designs and avoid coming across as trying to make yourself look clever!
