

Session 15: Design Presentations

Context: Introduction to Permaculture Design course, second day

Duration: 45 minutes

Aims: To allow the students to present their designs to each other.

Learning outcomes: By the end of the session, students will:

- Have presented their designs
- Watched presentations of other groups' designs

Method & timings:

Divide the time between the number of groups, allowing a few minutes after each presentation for Q&A and allow a few minutes at the end for a quick go round to get people's impressions.

For example: 4 x groups = 4 x 10 minute presentations including 2 or 3 minute Q&A plus 5 minutes at the end. 3 x groups = 3 x 13 minute presentations including 3 minute Q&A and 6 minute go-round.

Resources: Flipchart, whiteboard or wall to hang drawings up. Blu-tac or sellotape.

NOTES: If you have a lot of groups, you may wish to extend this session and drop or shorten the earlier Design slide show session.
